Albany State University is accredited by the Commision on Colleges of the Southern Association of Colleges and Schoools (1866 Southern Lane, Decatur, Georgia 30033-4097; telephone number 404-679-4501, fax number 404-679-4500) to award the BA, BS, MA, MBA, MPA and ED.S. Degrees.

Graduates who complete the associates degree in Fire Science Technology can take their career to the next level with Albany State University's new bachelor's degree in Fire Services Administration. "Our online fire services management degree will provide training in key administrative areas such as personnel administration, financial management, strategic planning, and project management—providing the skills and knowledge that will qualify fire fighting professionals for advancement into supervisory, managerial and leadership positions, up to and including chief, " says Michael Rogers, coordinator of ASU's College of Business degree program.

Under the leadership of President Everette J. Freeman and Commissioner Ron Jackson, Technical College System of Georgia (TCSG) and Albany State University have teamed to provide firefighters the credentials needed for career advancement. Students can earn an associates degree in Fire Science at TCSG; then seamlessly transfer to ASU to continue studies and graduate with a Bachelor of Applied Science in Fire Services Administration. The partnership is unique and the first of its kind in Georgia. Dr. Rogers adds that "most every fire agency or department, as well as other organizations that employ fire technology experts requires bachelor's or even master's degrees to be promoted through the managerial ranks.

James Carswell, Chief of the Albany Fire Department, states: "I am very proud of the fire services program at Albany State University. It has been a long time coming. Previously, fire service professionals in Georgia had to go out of state to study for a bachelor's degree. The partnership between ASU and the technology colleges allow Georgia firefighters who wish to pursue management careers to compete for those positions, not only in the Peach State, but anywhere in the country."
